

Write a program to display the information of the student using different data types

1. id(int)
2. name (String)
3. mobile\_no (long)
4. marks (double)

Note: Upload assignment in PDF format.

```
package PA;

public class StudentInfo {

    public static void main(String[] args) {
        // TODO Auto-generated method stub
        int id = 101;
        String name = "Bhumika Jain";
        long mobileNo = 9876543210L;
        double marks = 96;

        // Display student information
        System.out.println("Student Information:");
        System.out.println("ID: " + id);
        System.out.println("Name: " + name);
        System.out.println("Mobile Number: " +
mobileNo);
        System.out.println("Marks: " + marks);
    }

}
```

Output:-
