write a java program to print the value assigned to a given variable along with the string concatenated.

```
System.out.println("value " + n);
                // Type your code below

        }
}
```

Write a java program to convert given double value into integer value as shown in expected Output.

```
int integerValue = (int) n;

                System.out.println(integerValue);
                // Type your code below

        }
}
```
